“Blue being a sign of freshness and elegance creates a classic and clean atmosphere. Choose blue as the only accent colour for the decor.”

P A S T E L POWER

No longer confined to just kid's room, pastel colours are finally having their own heyday. We take you to the benefits of using pastels in living spaces

We have to admit this that no matter how much we adore bolds and brights, we always have a soft spot for lighter, feminine shades. There's something so soothing and so magical about mint, pink and light yellow that we just can't resist. Soft, varied and versatile, they can be fairly neutral when necessary. All you need to do is make statement by placing pastel pieces throughout your living space. But if you are still not ready to go all out, try adding a rug to serve as a small, but powerfully effective pop of colour.

Plusch

“Add a fresh look to your homes by adding summer colours and minimal interiors. Foster your creativity and infuse light shades that reflects light to the most.”
